Realize Inc Expands Facilities with New Building to Accommodate Double Digit Growth

Fishers, Ind. - Realize Inc is starting construction on a new 8,150 square foot facility inside the new Noblesville Corporate Campus, three miles from their current location in Fishers, IN. The new building is a dramatic increase from their current 4,600 square foot facility and is necessary to accommodate additional growth by allowing Realize to add new equipment and personnel.

Owned by husband-wife team, Todd and Tonya Reese, Realize Inc has grown from a one man operation to one of the largest rapid prototyping service bureaus in the Midwest since its inception in 1999. The company, which currently employs 12, specializes in new product development and creates prototypes from computer designs. The new building is the necessary next step to phasing in additional growth.

Built by The Mattingly Corporation and financed by National City Bank and Premier Capital, construction on the new building is expected to commence in September, 2006 with an anticipated completion date in March, 2007. Realize Inc. acquired 1.5 acres for the building, with the ability to further expand facilities an additional 8,000 square feet at a later date as their business continues to grow. As an incentive to move to the Corporate Campus, Noblesville has provided Realize with a two year tax abatement for the relocation to occur.

“We are thrilled to begin the next step in expanding our business with a new state-of-the-art facility,” states Tonya Reese, co-owner. “We want to continue providing excellent turn around times for our customers and need the additional space to accommodate the rapid growth we have been experiencing at Realize.”

Realize Inc has also been recognized recently by industry provider 3D Systems Inc, who has recently awarded Realize with their Preferred Service Provider status, a designation currently awarded to only 5 other rapid prototyping service providers in the United States. This distinguished status is provided to acknowledge expertise with specialized equipment that aids in the creation of physical models from computer designs.

About Realize, Inc.
